# Transferring a Kindle Book Via USB -A Visual Guide

(for USB Only titles and devices without WiFi)

1. Certain books cannot be transferred wirelessly. You will notice the words "USB Only" in the Available Formats section.

2. When you click "Borrow" on these items and select "Kindle Book", you will notice the "USB Only" message again.

3. After you "Confirm and Download", you will be taken to the download page on Amazon. Click "Get Library Book" (on the right).

4. If you are not signed in to Amazon, you will be asked to do so. Then choose the device you want to download to and click "Continue". After clicking "Get library book" you will asked to select your device, then "Continue".

5. Now this screen appears, and a window should open to open the file:

6. Choose "Save File". This will save your Kindle book to the default Download location on your computer (usually the "Downloads" section on your computer's C drive).

7. Open "My Computer" (or "Computer") to see the disk drives and other hardware connected to your computer. Plug your Kindle into your computer via the USB cable. You should see an icon for your Kindle appear in the left-hand column.
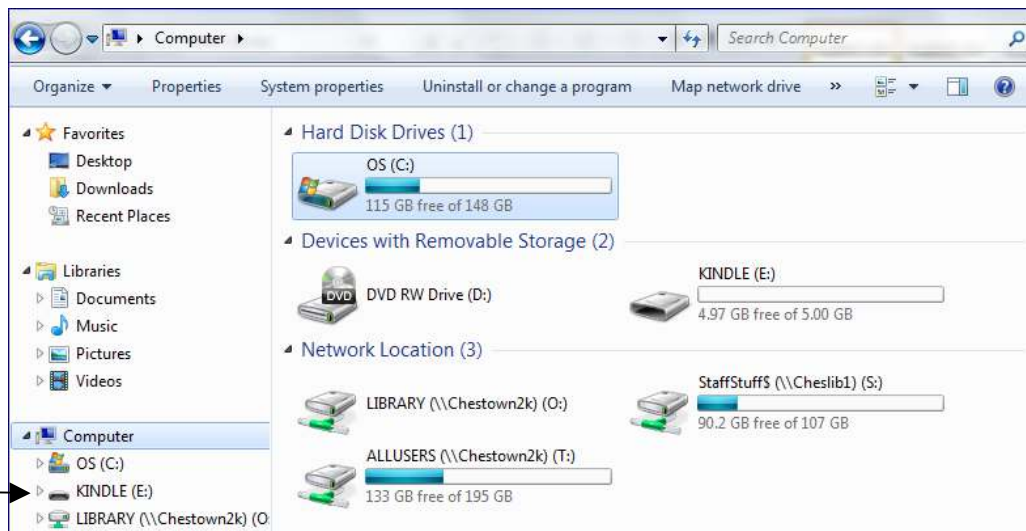

8. Open your Downloads Folder to find the book you downloaded.
   Open your Kindle drive. You should see a folder entitled "Documents".
   Click and Drag your book from the Downloads Folder on your computer to the Documents Folder in your Kindle.
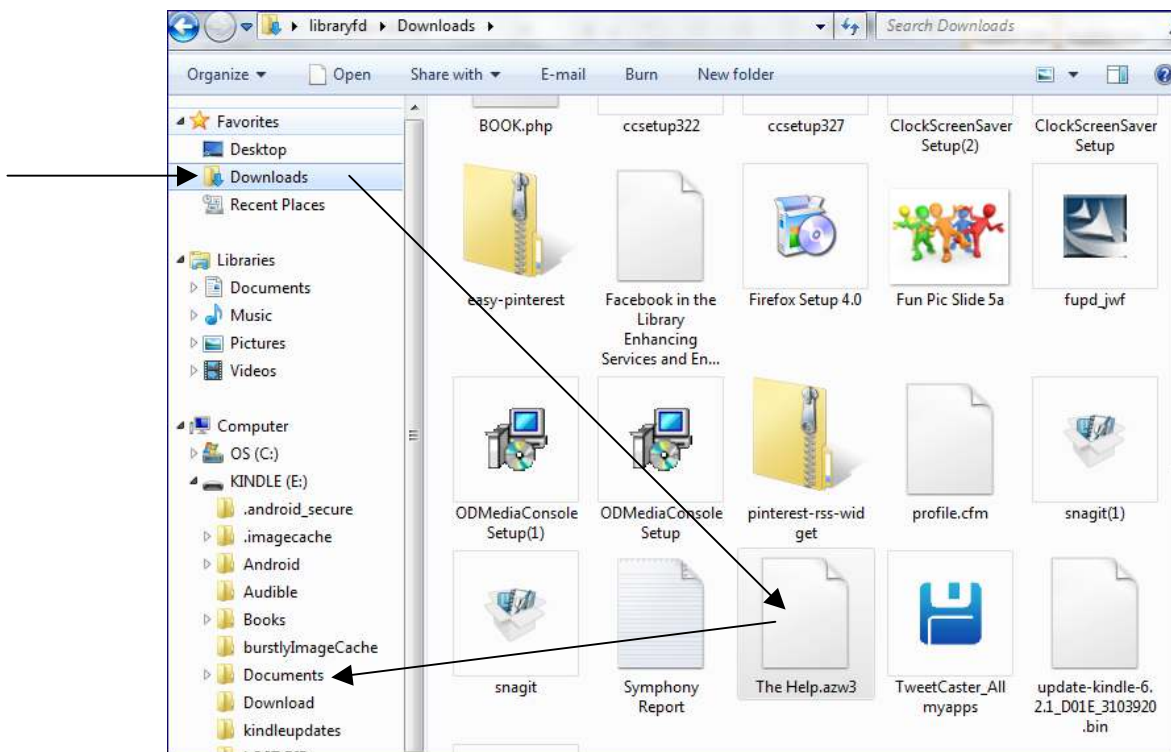

9. Using your computer, eject your Kindle from your computer. The content you transferred should now appear in Home on your Kindle.
